

The interior of Alias features flat white walls trimmed with edge exposed plywood which provides warmth and architectural detail to the space. The floor is faux wood laminate which matches the warmth of the trim.

Lighting is controlled by multi-directional track lights with 3500K bulbs. The space includes a mini-split for cooling & heating, a restroom with toilet and sink, a work/storage area, and small refrigerator.

The exterior includes landscaping, signage on the building, a branded sandwich board sign, a OPEN flag, a bench for outdoor seating and grassy area that can be activated.
